About Me

Hi my name is Doug Silkstone.

For the past 15 years I've been working across engineering, product, and growth with clients including Contra, Framer, The Motley Fool, Groupon, and Techstars-backed early stage startups.

I've built and sold three products as a solo founder, helped others go from zero to their first paying customer, and my clients have collectively raised 20 million USD in early-stage funding.

My work on applied LLM tooling has been featured in MIT's Generative AI course, taken by over 50,000 students, and as the author of many open-source automation NPM packages, I'm deeply invested in using software to accelerate problem-solving across competitive, emerging tech spaces.

Nowadays, I'm coding daily to help others do better work faster, and I share my knowledge and experience as a mentor for others. I'm looking for ownership of a revenue adjacent problem I can adopt as my own. Opportunities to build and mentor a team as success grows are a must.

Technical Skills

- Languages: TypeScript. Python. C++
- Technologies: React, (8 years) Next.js, Express, Node, Tailwind, Vercel, AWS, Postgres, Mongo, GCP.
- Other: Scraping & Automation, Martech & Analytics, Growth Engineering, Agentic Workflows.

Work Experience

Position: DinnersWithFriends.co.uk Technical Founder — (2024 - Present)

TypeScript, React, Next.js, Hono, Postgres. GCP.

- Designed, developed, and owned all aspects of digital for dinnerswithfriends.co.uk, a platform that matches people together for a no-expectation, lovely evening of good conversation and good company. Tipped as the South West of England's newest in-trend experience.
- Implemented a complex merchant-of-record style setup using Stripe Connect to support our franchise model and growth.
- The site is heavily SEO-optimized and has robust product/market analytics tracking, email automation for transactional and marketing communicate, messaging queues, revenue dashboards, and LLM-powered workflows in the admin panel.

Position: Patrianna Ltd Lead Growth Engineer — (2022 - 2023)

TypeScript, Next.js, React, Postgres. Java Spring.

- Led greenfield in-house Game Studio function for a top-three social casino from zero to 1mil players as product owner and full-stack developer. Built out MVP game delivery mechanism and five high-stakes casino games, hired and led a nine-member team to take the games studio to millions of players.

Position: getBenson.com - Senior Full-stack Developer— (2021-2022)

TypeScript, React, Next.js, Node, Express

- Built SAAS App, script delivery system, and client-side script for getBenson.com from scratch, protecting over 25 million monthly sessions by detecting and manipulating DOM events to detect web extensions and block them from rendering, working, and leaking discount codes. Stripe integrations.
- Rewrote first pass MVP to production codebase using Express, Typescript, Drizzle, Postgres.
- Onboarded over 80 brands, including Theory11.com, wrote technical documentation, and led technical sales calls with C-Suite directors to tailor Benson to their e-commerce goals.
- Commercially exited in 2023.

Position: withSeismic.com - Full Stack Engineering Consultant — (2016 - Present)

TypeScript, JavaScript, Node, Express

Full-time Consultancy. Over the last 10 years, I've worked across engineering, growth, and greenfield initiatives with Contra.com, Sky, Groupon, The Motley Fool, Framer, and MIT.

Position: Vouchernaut.com - Full Stack Software Engineer — (2018 - 2021)

Role: TypeScript, JavaScript, Next.js, Node, Express, Gatsby

- Lead engineer for affiliate network automation system to collect data, affiliate links, and discount content for over 10,000 brands internationally. Express, Node, Puppeteer. Postgres.
- Developed voucher publishing portal site with Express, Node, and React, serving 250k sessions monthly.
- Rebuilt site from Gatsby to Next.js, leveraging SSR and SSG to increase organic traffic by 60%.
- Sold Vouchernaut technology to Private Equity investors in 2021.

Mekamon.com / Reach Robotics - Head of Digital — (2016 - 2018)

Go-to-market strategy for DTC consumer electronics - An AR Spider Robot - launched in Apple stores globally.

- Launched Robot Spider toys with Apple Stores internationally.
- Developed and led E-commerce (Shopify + WordPress) project for international release.
- Implemented Martech and Analytics solutions for customer site and in-app analytics (GA, GTM, Unity, BigQuery + Firebase Analytics).
- Hired and led a team across digital, marketing, customer support, and procurement.

Vouchercloud - Performance Marketing & Automation (2015 - 2016)

- Managed multi-million-pound paid search budget for 15 international websites with automation on reporting, ad generation, and feeds.
- Built internal tools with React to streamline business processes, saving 240 monthly hours and cutting the SEM team's overhead by 40%.
- Later Acquired by NASDAQ listed company

Beatlock Records - Digital Marketing Manager 2014 - 2016)
